Minutes:

Agenda Item	Summary of Discussion	Action/Decision	Person Responsible
<p>Tim R. and Lee Q. HSR Architects Discussion ISD 300 Building Project Sustainability 10 Minutes</p>	<p>Hi Jason,</p> <p>Thank you for reaching out to us. We value sustainability and believe it is integral to successful design and construction practices. However incorporating these sustainable strategies is not part of the referendum scope and/or design services for this project.</p> <p>As part of good design practices we are evaluating cost effective sustainable strategies with the district including energy efficiency, life cycle analysis, longevity, and clean renewable energy sources.</p> <p>Please note any additional sustainable scope and/or additional design services has to first be reviewed and approved by the district. This meeting is currently outside of our A/E contract.</p> <p>Thanks,</p> <p><i>Tim Ruppert</i> <i>Architect</i></p>		
<p>Carbon-free energy resolution - vote</p>	<p>Link to Resolution here.</p>

Residential energy disclosure	While energy costs are one of the largest ongoing costs of home maintenance, most potential homeowners and renters have no way of estimating what these costs will be before		

CITY OF LA CRESCENT - GREEN STEPS TEAM 2018-19

<p>10 Minutes</p>	<p>moving into a home. Residential energy disclosure policies require sellers or landlords to make home energy performance information available to prospective buyers and/or renters. This type of information enables cities to drive more energy efficiency upgrades, protect consumers and help them make informed decisions, create jobs and invest in local businesses, and reduce energy burdens for low income households.</p>
