La Crescent Landscape Partnership Agreement	Cooperative Agreement and planting planning, Site prep		
Event center landscape spaces prairie plantings (natives)	<u>Met with Joyce Cielecki - Plan for Veterans Park - See plan</u>		

CITY OF LA CRESCENT - GREEN STEPS TEAM 2018-20

still among the living. We weeded each of the 4 plant beds and plan to go back and move some of the shredded bark around.

Along S. Chestnut St., we walked each site. The north and middle sites show promise, while we think the south site needs to be replanted. A suggestion would be to plan on a site visit to each site in the near future to figure out a game plan. While at the north site, we pulled a number of small Siberian elm and mulberry trees. The lower 2 sites also have infestations of both of those plants. Regrettably, all 3 sites have crown vetch and birdsfoot trefoil colonization; the lower site also has a spotted knapweed infestation in one corner where plants were flowering.
