

Free MPCA Smart Salting for Parking Lots & Sidewalks Certification Training

This MPCA Smart Salting Certification Training class is an opportunity to learn more efficient winter maintenance best practices (BMPs) while taking a comprehensive look at the many aspects for managing snow & ice on parking lots and sidewalks.

In the case of severe weather or other hinderance to in-person meeting, the class will be moved to the first week of March. Instructors will teach a hybrid class with in-person and virtual options in real-time. Participants will interact with instructors and other participants through live chats, polls, and class discussion.

Who should attend?

- Hands-on public or private winter maintenance staff
- Those who hire or supervise winter maintenance staff
- Private contractors
- Those who may influence others or are interested in making a difference at work

What you'll learn:

- Environmental impacts of chloride
- Equipment calibration
- Using weather condition info more efficiently
- Application rates
- Plowing and physical removal
- BMPs for storing materials
- De-icing and anti-icing
- Regulatory issues and managing liability
- Customer and staff educational resources
- Success stories
